

TEST WITH CITA

2015

Bring CITA to Your School

CITA administers the ADEX dental licensure exam—the most widely accepted dental licensure exam—and the CITA dental hygiene exam. Through efficient, expedient, and professional administration of exams, CITA is able to deliver exam results faster than any other organization in the dental licensure community. At many of our testing sites, students of record receive discounts on facility fees and staffing fees, which helps candidates save money. Additionally, CITA allows **D3 students** to begin the licensure exam process.

Finding patients locally

Candidates who are able to network through their local clinics to find patients are often less stressed because they:

- **Do not have to pay for expensive travel arrangements for patients**
- **Can communicate face-to-face with patients as they prepare**
- **Have a larger network in which they can find a back-up patient**

CITA: providing psychometric, technical and administrative services in the administration and delivery of clinical licensure examinations in dentistry and dental hygiene.
